

John is a pre-final year Engineering student, an advanced web developer, and an out of the box thinker. He heard from seniors that there wasn't any company recruiting students for web development that year. John got more scared when he heard the placement cell of his college allow only students above 8GPA to sit for placements.

We launched LinkedIn TnP, a platform that takes care of both training and placement. Here skill matters and not grades. Students have access to 15,000+ expert-led courses and at the end of their academic year, students will be eligible to write LinkedIn General Test which is the last step for placements. But fret not, LGT is unique for each field.

Our results are 15K+ downloads in a short span of 30 days with more than 3000 final year students using our platform to reach their desired job.

**15K+**  
Downloads

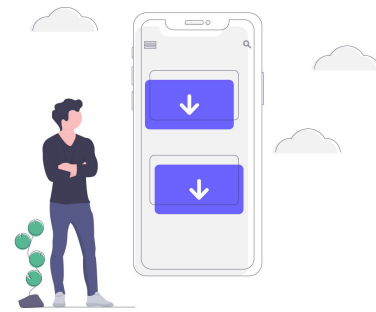

**3000+**  
Active users

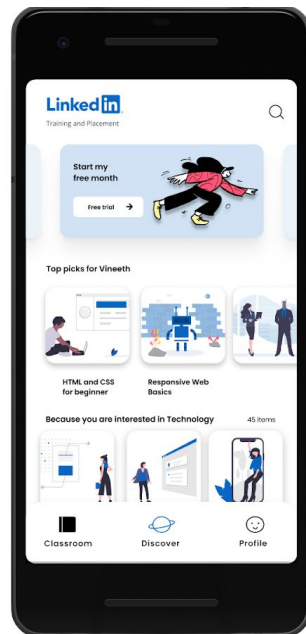

**4.5 rating**  
in App / Play Store

**Auto Recommendation**  
*Spend your time learning and not on searching  
 We will do that for you.*

**Download Course Videos**  
*Facing low net connections? Fret not!  
 Download the course now and study later.*

**Live Mentoring**  
*Have doubts that are not solved yet?  
 Here you won't be stuck.*

**Set Reminders / Goals**  
*Losing enthusiasm day by day?  
 Set your goals and reminders to focus!*

We are going to add more features based on our customer reviews and We are extending hands to partner with the College universities across the globe to provide quality training and placement experience for final year college students. And you will be able to create a learning classroom and connect with peers to enhance learning.
